## SAFETY WARNINGS

TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE THE COVER(OR BACK). NO USER-SERVICEABLE PARTS ARE INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

This symbol indicates “dangerous voltage” inside the product that presents a risk of electric shock or personal injury.

This symbol indicates important instructions accompanying the product.

### Note to CATV system installer

This reminder is provided to call the CATV system installer’s attention to Section 820~40 of the NEC which provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

### WARNING

To reduce the risk of fire or electric shock, do not expose this appliance to rain or moisture.

### CAUTION

Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.

## PRECAUTIONS

Ensure that the AC power supply in your house complies with the identification sticker located on the back of your player. Install your player horizontally, on a suitable base (furniture), with enough space around it for ventilation (3-4inches). Make sure the ventilation slots are not covered. Do not stack anything on top of the amplifier. In order to disconnect the player completely from the power supply, remove the AC plug from the wall outlet, especially when left unused for a long period of time.

During thunderstorms, disconnect the AC plug from the wall outlet.  
Voltage peaks due to lightning could damage the unit.

Do not expose the unit to direct sunlight or other heat sources.

This could lead to overheating and malfunction of the unit.

Protect the player from moisture (i.e. vases), and excess heat (e.g. fireplace) or equipment creating strong magnetic or electric fields (i.e. speakers...). Disconnect the power cable from the AC supply if the player malfunctions. Your player is not intended for industrial use.

Use of this product is for personal use only.

Condensation may occur if your player or disc have been stored in cold temperatures.

If transporting the player during the winter, wait approximately 2 hours until the unit has reached room temperature before using.

The batteries used with this product contain chemicals that are harmful to the environment.

Do not dispose of batteries in the general household trash.

# Features

## Digital AV Receiver

This product is a pure digital AV receiver that performs digital signal processing to minimize signal distortion and loss.

## Dolby Pro Logic IIx

Dolby Pro Logic IIx is a new technology that provides discrete 7.1 channels out of 2 channel or multi channel sources. It also provides Music, Movie and Game modes. Dolby Pro Logic IIx is an improved surround system that is optimized to a 7.1 CH multimedia system, enabling you to maximize your entertainment experience.

## Dolby Pro Logic IIz

Dolby Pro Logic IIz adds front height channels to surround sound, creating a 7.1 playback system for video games, home music, and movies; bringing enhanced spatial effects and enveloping sound.

## DTS 96/24

DTS 96/24 encodes standard 16 bit/44.1 kHz sound to 24 bit/96kHz and applies it to a 5.1 CH sound track.

## DOLBY DIGITAL EX

Adds a surround back channel for more spacious sound compared to regular 5.1 channel Dolby Digital.

## DTS (Digital Theater Systems)

DTS provides a discrete 5.1 CH digital audio signal for both music and movie contents and uses less compression than Dolby Digital for richer sound.

## Dolby Digital Plus

Dolby Digital Plus is the next-generation audio technology for all high-definition programming and media.

## Dolby True-HD

Dolby True-HD is Dolby's next-generation lossless technology developed for high-definition disc-based media.

## DTS-HD (Master Audio, High Resolution) (Digital Theater Systems - High Definition)

DTS-HD Audio provides the highest quality multi-channel sound possible. It delivers sound quality that matches the clear and vivid images of high-definition video.

## DTS NEO:6

Provides a full range of 6 channels by converting a digital PCM or analog stereo signal using DTS digital matrix decoding.

## iPod

You can enjoy music files by connecting your iPod/iPhone to the AV Receiver with the supplied iPod dock.

## SFE (Sound Field Effect) Using 32bit Audio Digital Signal Processing

Provides more realistic surround sound with normal stereo audio sources.

## Anynet+ (HDMI-CEC) Function

Anynet+ is a function that can be used to operate this AV Receiver with a Samsung TV remote control, by connecting the receiver to a SAMSUNG TV using an HDMI Cable. (This function is available only in connection with Samsung TV and DVD player supporting Anynet+(HDMI-CEC).)

## DTS-ES (Extended Surround)

The DTS-ES (Extended Surround) system is a new multi digital signal format that was developed by Digital Theater Systems Inc.

Supporting full compatibility with the conventional DTS digital surround sound format, the DTS-ES (Extended Surround) system improves the surround signal for a 360-degree surround effect.

DTS-ES adds an additional rear center surround channel for 6.1 channel sound.

## INSERT REMOTE CONTROL BATTERIES

\* Battery size: AAA

Follow these precautions to avoid leaking or cracking cells:

- Place batteries in the remote control so they match the polarity : (+) to (+) and (-) to (-).
- Assuming typical TV usage, the batteries last for about one year.
- Use the correct type of batteries. Batteries that look similar may differ in voltage.
- Always replace both batteries at the same time.
- Do not expose the batteries to heat or a flame.

## OPERATION RANGE OF THE REMOTE CONTROL

The remote control can be used up to approximately 23 feet/7 meters in a straight line. It can also be operated at a horizontal angle of up to 30° from the remote control sensor.

# Connections

This section involves various methods of connecting the AV receiver to other external components. Before moving or installing the product, be sure to turn off the power and disconnect the power cord.

## SPEAKER POSITIONING

There are two methods for positioning the speakers.

When using Dolby Pro Logic IIz, place the Surround Back Speakers in the FHL, FHR position and connect them to SURROUND BACK/ FRONT HEIGHT Jack.

\* The HW-C700/C700B model does not supply speakers (sold separately).

L, R, C, SW, SL, SR, SBL, SBR (Dolby Pro Logic IIx)    L, R, C, SW, SL, SR, FHL, FHR (Dolby Pro Logic IIz)

## Position of AV Receiver

Place the AV Receiver on a dedicated stand or rack.

## Subwoofer **SW**

The position of the subwoofer is not so critical. Place it anywhere you like.

### Subwoofer function (HW-C770S/C770BS only)

Active subwoofer with integrated 150W amplifier provides rich bass sound.

- Connect the **SW OUT** terminal of the amplifier to the **INPUT** terminal of the subwoofer speaker.
- Press the **POWER** button on the rear side of the subwoofer to turn the power on.
- Using the subwoofer's **VOLUME** control, you can set the desired bass level (See page 36 "Setting the speaker level" to set the subwoofer level in the menu).

## Front Speakers **L R**

Place these speakers in front of your listening position, facing inwards (about 45°) toward you.

Place the speakers so that their tweeters will be at the same height as your ears.

Align the front face of the front speakers with the front face of the center speaker or place them slightly in front of the center speaker.

## Center speaker **C**

It is best to install it at the same height as the front speakers.  
You can also install it directly over or under the TV.

## Surround Speakers **SL SR**

Place these speakers behind your listening position.  
If there isn't enough room, place these speakers so they face each other.  
Place them about 2 to 3 feet (60 to 90cm) above your ears, facing slightly downward.  
Unlike the front and center speakers, the surround speakers are used to handle mainly sound effects and sound will not come from them all the time.

## Surround Back Speakers **SBL SBR**

If you are using two rear center speakers, place them behind the listening position.  
Place the surround back speaker about 2.3-3.3 feet (70 cm to 1 m).

## Front Height Speakers **FHL FHR** (Using Dolby Pro Logic IIz)

When using Dolby Pro Logic IIz, place the Surround Back Speakers on the FHL, FHR position above the front L and front R speakers at least 3.3 feet(1 m) above each one.

- Using the Surround Back Speakers as Front Height Speakers -

1. Fasten 2 screws(not supplied) for each speaker on the wall above the front L and R speakers.
2. Install the Surround Back Speakers (L, R) by fitting the holes on the back the Surround Back Speakers to the screws on the wall.

- When you attach the speakers to the wall, make sure to fasten them tightly so they do not fall off.

## Speaker Configuration

For the best surround-sound experience, you should connect seven speakers and a powered subwoofer.  
The following table shows which channels you should use based on the number of speakers you have.

2 speakers	3 speakers	4 speakers	5 speakers	6 speakers	7 speakers (DPL IIx)	7 speakers (DPL IIz)
<b>L</b>	<b>L</b>	<b>L</b>	<b>L</b>	<b>L</b>	<b>L</b>	<b>L</b>
<b>R</b>	<b>R</b>	<b>R</b>	<b>R</b>	<b>R</b>	<b>R</b>	<b>R</b>
	<b>C</b>		<b>C</b>	<b>C</b>	<b>C</b>	<b>C</b>
		<b>SL</b>	<b>SL</b>	<b>SL</b>	<b>SL</b>	<b>SL</b>
		<b>SR</b>	<b>SR</b>	<b>SR</b>	<b>SR</b>	<b>SR</b>
				<b>SBL</b>	<b>SBL</b>	<b>FHL</b>
					<b>SBR</b>	<b>FHR</b>

- No matter how many speakers you use, a powered subwoofer is recommended for powerful and solid bass.
- If you place a speaker near your TV set, screen colour may be distorted because of the magnetic field generated by the speaker. If this occurs, place the speaker away from your TV set.

# Connections

## CONNECTING THE SPEAKERS

- One Active Subwoofer is provided, if you would like to use another, purchase it from the retailer where you bought the player and connect it to the other SUBWOOFER OUT Jack.
- When using Dolby Pro Logic IIz, connect the Surround Back Speakers (FHL, FHR) to SURROUND BACK/FRONT HEIGHT Jack.

### Connecting Speaker Wire

- Loosen the knob by turning counterclockwise.
- Insert the bare part of the wire into the hole in the side of each terminal.
- Tighten the knob by turning clockwise to secure the wire.

- Keep the subwoofer speaker out of reach of children to prevent them from inserting their hands or objects into the duct (hole).
- Never touch speaker terminals while the power is on. Doing so could result in electric shock.
- Make sure the polarities (+ and -) are correct.

### Connecting the Speakers

- Press down the terminal tab on the back of the speaker.
- Insert the black wire into the black terminal (-) and the red wire into the red (+) terminal, and then release the tab.
- Connect the connecting plugs to the back of the AV Receiver.
  - Make sure the colors of the speaker terminals on the back of the AV receiver match the colors of the connecting plugs.

## CONNECTING EXTERNAL DEVICES/YOUR TV VIA HDMI

HDMI is a digital standard interface for connection to such devices as a TV, projector, DVD player, Blu-ray player, set-top box and more.

HDMI removes any loss of signal from analog conversion, enabling you to enjoy video and audio sound quality as it was originally created in the digital source.

By connecting through the HDMI(High-Definition Multimedia Interface) interface, you can play back digital video and audio.

### High-bandwidth Digital Content Protection System (HDCP) support

To play digital contents through the HDMI connection, both the connected external device and TV must support High-bandwidth Digital Content Protection System (HDCP). This product supports HDCP.

Compatibility with a TV Supporting HDMI	
A TV with an HDMI jack.	Video/Audio
A TV with a DVI-D jack (TV supporting HDCP)	Video
A TV with a DVI-D jack (TV not supporting HDCP)	-

- Audio from SACD discs will not be heard with this connection. To play a DVD disc whose copyright is protected by CPPM, use a player supporting CPPM.
- The quality of the audio output through the HDMI jack (sampling frequency and bit rate) may be limited by the performance of the connected device.
- Since HDMI connection supports both video and audio, you don't have to connect an additional audio cable.

## HDMI FUNCTION

---

### Using Anynet+(HDMI-CEC)

---

Anynet+ is a function that enables you to control other Samsung Devices with your Samsung TV's remote control. Anynet + can be used by connecting this AV Receiver to a SAMSUNG TV using an HDMI Cable. This is only available with SAMSUNG TVs and SAMSUNG AV Products that support Anynet+.

1. Connect the AV receiver to a Samsung TV with an HDMI cable. (See page 17)
2. Set the Anynet+ function on your TV.  
(See the TV instructions manual for more information.)
  - You can operate the volume on the AV receiver by using Volume buttons on the TV remote control.

### To turn on Anynet+

---

1. Press the **SETUP/MENU** button.
  - Each time the button is pressed, the mode switches between **SETUP ENTER** and **SETUP OFF**.
2. Press the **ENTER** button to select **SETUP ENTER**.
3. Press the **▲ ▼** buttons to select **HDMI SETUP**, and then press the **ENTER** or **▶** button.
4. Press the **▲ ▼** buttons to select **HDMI ANYNET+**, and then press the **ENTER** or **▶** button.
5. Press the **▲ ▼** buttons to set **ANYNET+** to **ON**.

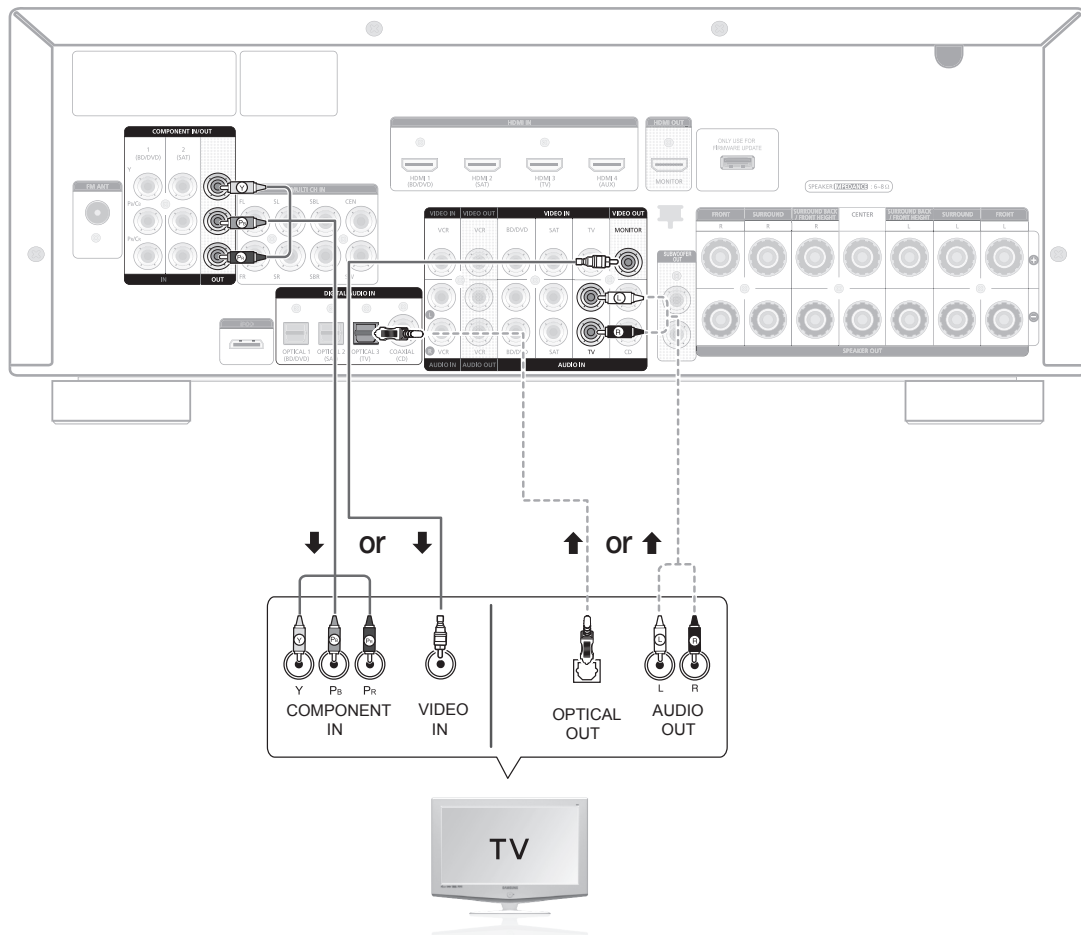

#### - To exit setup mode-

- Press the **SETUP/MENU** button.  
**SETUP OFF** appears on the display and Setup Mode is exited.

- If you use an HDMI cable to connect a Samsung TV to your AV Receiver, you can operate the AV receiver using the TV's remote control. This function is available only in connection with Samsung TV and DVD player supporting Anynet +(HDMI-CEC).
- Please check your TV for the *Anynet+* logo. If your TV has an *Anynet+* logo, then it supports the Anynet+ function.
- When you are making Anynet+ connection, do not connect more than two AV receivers (Anynet+ installed). Otherwise, it can cause a malfunction.

## CONNECTING TO YOUR TV

### Video Connection

If your television is equipped with Component Video inputs, connect a Component video cable(not supplied) from the Component Video Output (P<sub>R</sub>, P<sub>B</sub> and Y) jacks on the back of your AV Receiver to the Component Video Input jacks on your TV.

**OR**

Connect the Video cable from the VIDEO OUT (MONITOR) jack on the back of your AV Receiver to the Video Input jack on your TV.

### Audio Connection

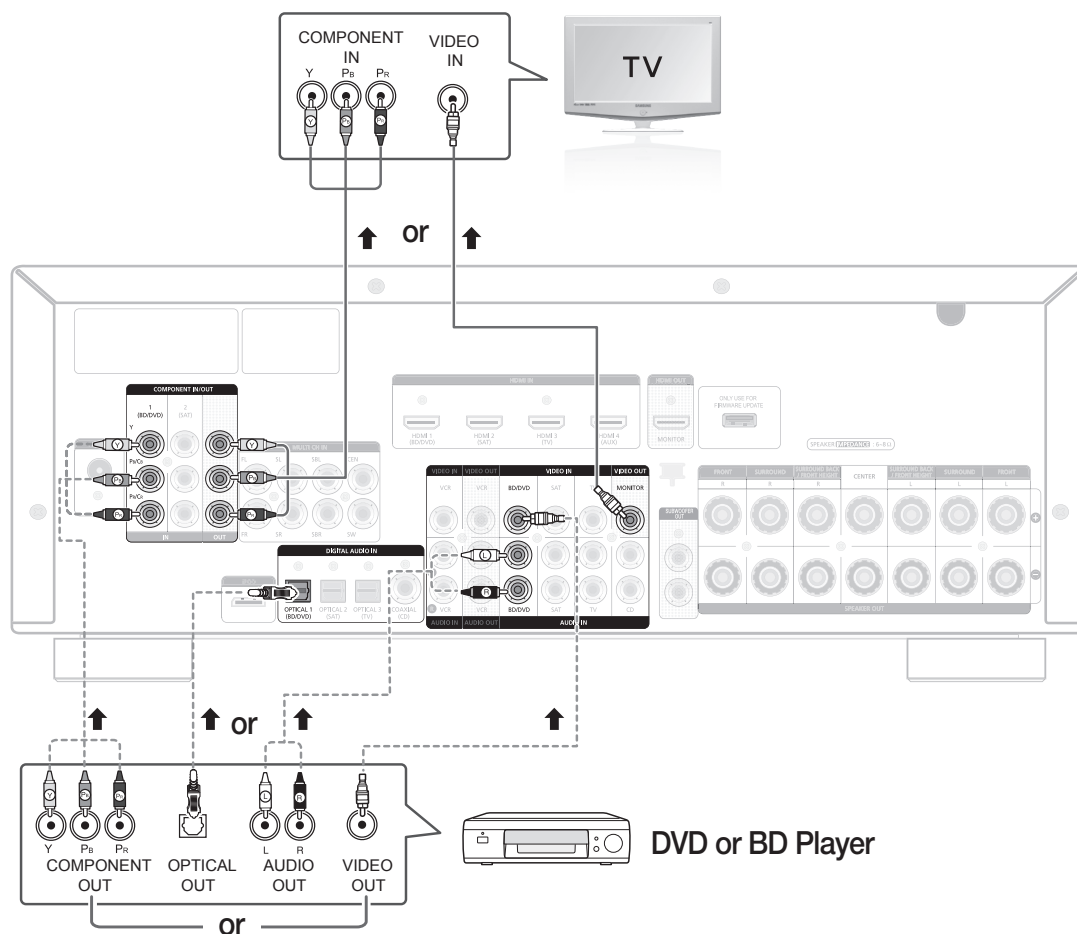

Connect the Digital Input (OPTICAL 3) on your AV Receiver to the Digital Output of the TV.

**OR**

Connect AUDIO IN (TV) on your AV Receiver to the Audio Out of the TV.

# Connections

## CONNECTING A DVD OR BD(Blu-ray) PLAYER

### Video Connection

Connect a Component video cable(not supplied) from the COMPONENT IN (BD/DVD) (P<sub>R</sub>, P<sub>B</sub> and Y) jacks on the back of your AV Receiver to the Component Video Output jacks on your DVD/BD player.

**OR**

Connect a Video cable from the VIDEO IN (BD/DVD) jack on the back of your AV Receiver to the Video Output jack on your DVD/BD player.

### Audio Connection

Connect the Digital Input (OPTICAL 1) on your AV Receiver to the Digital Output of the DVD/BD player.

**OR**

Connect AUDIO IN (BD/DVD) on your AV Receiver to the Audio Out of the DVD/BD player.

## CONNECTING A CABLE, SATELLITE OR SET-TOP BOX

### Video Connection

Connect a Component video cable(not supplied) from the COMPONENT IN (SAT) (P<sub>R</sub>, P<sub>B</sub> and Y) jacks on the back of your AV Receiver to the Component Video Output jacks on your SAT.

**OR**

Connect a Video cable from the VIDEO IN (SAT) jack on the back of your AV Receiver to the Video Output jack on your SAT.

### Audio Connection

Connect the Digital Input (OPTICAL 2) on your AV Receiver to the Digital Output of the SAT.

**OR**

Connect AUDIO IN (SAT) on your AV Receiver to the Audio Out of the SAT.

- Disconnect the power plug from the outlet if you will not use this unit for a long period of time.
- If the cable/set-top box has only one audio output jack, connect it to either the right or left audio input jack of the main unit. Connect the audio cable's red plug to the red jack and white cable to the white jack.

# Connections

## CONNECTING A VCR

### Video Connection

#### For playback

Connect a Video cable from the VIDEO IN (VCR) jack on the back of your AV Receiver to the Video Output jack on your VCR.

#### For recording

Connect a Video cable from the VIDEO OUT (VCR) jack on the back of your AV Receiver to the Video Input jack on your VCR.

### Audio Connection

#### For playback

Connect AUDIO IN (VCR) on your AV Receiver to the Audio Out of the VCR.

#### For recording

Connect AUDIO OUT (VCR) on your AV Receiver to the Audio In of the VCR.

- Disconnect the power plug from the outlet if you will not use this unit for a long period of time.

## CONNECTING A CD PLAYER

### Audio Connection

Connect the Digital Input (COAXIAL) on your AV Receiver to the Digital Output of the CD Player.

**OR**

Connect AUDIO IN (CD) on your AV Receiver to the Audio Out of the CD player.

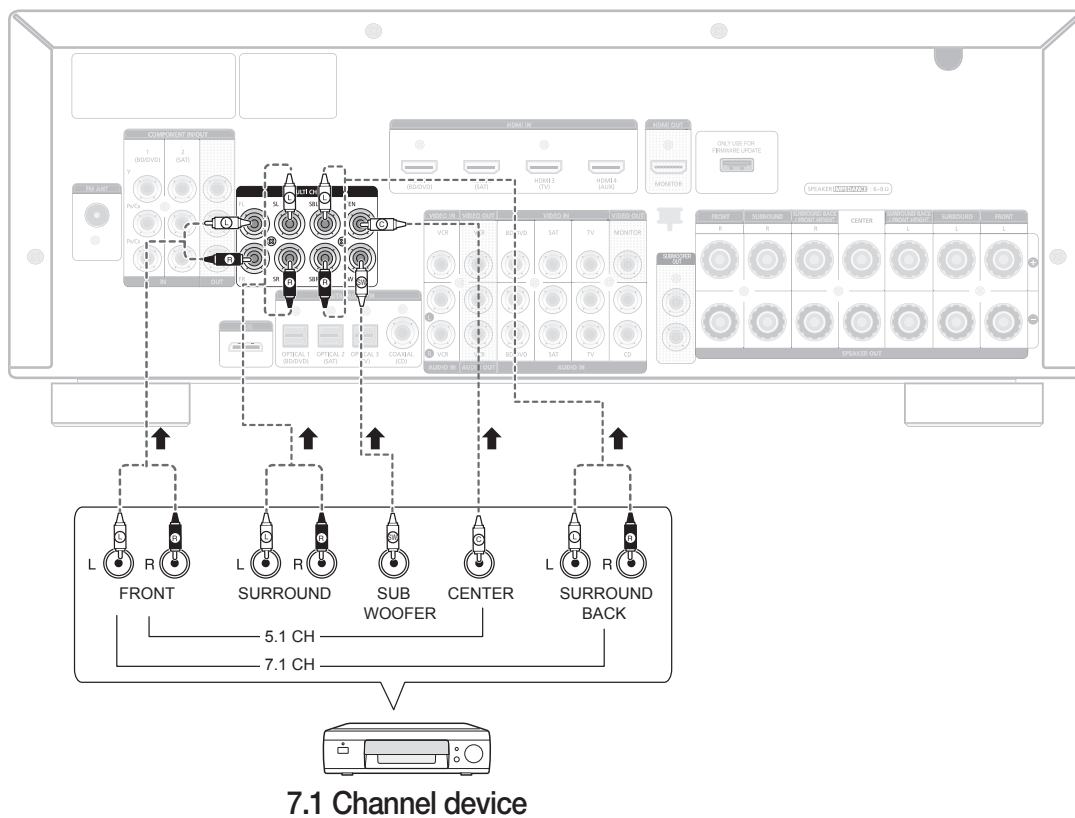

- If the CD player has only one audio output jack, connect it to either the right or left audio input jack of the main unit. Connect the audio cable's red plug to the red jack and white cable to the white jack.

# Connections

## CONNECTING 7.1 CHANNEL DEVICES

You can connect the AV receiver to a DVD player, SUPER AUDIO CD player or other device with 7.1 channel output.

## CONNECTING AN iPod

You can listen to audio from an iPod through the main unit. For iPod operation with your receiver, see this page and 48 ~ 49.

1. Connect the iPod dock connector to the iPod jack on your receiver.
2. Place the iPod in the Dock.
  - If you want to play a movie stored in your iPod player, you should set the player's **TV Out** option to **On** before inserting it into the dock. See page 49.
3. Press the **iPod** button on the remote control.
  - You can also use the **INPUT SELECT** button on the main unit.  
The mode switches as follows :  
**FM → BD/DVD → SAT → TV → VCR → CD → AUX → 7.1 MULTI CH → IPOD AUDIO → IPOD VIDEO**

## Disconnecting an iPod

Follow the steps below to prevent damage to an iPod and data when disconnecting from your AV receiver.

1. Press the **INPUT SELECT** button on the main unit to switch to a mode other than **IPOD AUDIO** or **IPOD VIDEO**.

OR

1. Turn off the AV Receiver.
2. Disconnect the iPod player from the iPod dock, or remove the iPod dock connector from the AV receiver.

- You must have the VIDEO (Monitor or VCR) output connected to your TV to view iPod video. See page 22.
- Adjust the volume to a moderate level before you connect your iPod and AV Receiver.
- When the unit is powered on and you connect an iPod, the unit will charge your iPod's battery.
- Make sure to connect the dock connector so that the label "**SAMSUNG**" faces upward.
- "Made for iPod" means that an electronic accessory has been designed to connect specifically to an iPod and has been certified by the developer to meet Apple performance standards.
- "Works with iPhone" means that an electronic accessory has been designed to connect specifically to an iPhone and has been certified by the developer to meet Apple performance standards.

## Using headphones

Use headphones (not supplied) for private listening pleasure.

Connect the headphones to the headphone (PHONES) jack and listen to music.

- 
  - Do not turn the volume up too high when you use headphones as it may damage your hearing.

## SOFTWARE UPGRADE

Samsung may offer upgrades for AV Receiver's firmware in the future.

Please visit [Samsung.com](http://Samsung.com) or contact the Samsung call centre to receive information about downloading upgrades and using a USB drive. Upgrades will be possible by connecting a USB drive to the USB port located on your AV Receiver.

- 
  - Insert a USB drive containing the firmware upgrade into the USB port on the back of the main unit.
  - Please be careful to not disconnect the power or remove the USB drive while upgrades are being applied. The main unit will turn off automatically after completing the firmware upgrade. When software is upgraded, settings you have made will return to their default (factory) settings. We recommend you write down your settings so that you can easily reset them after the upgrade.
  - If you failed software upgrade, it is strongly recommended whole USB data format to FAT16 and retry software upgrade.
  - The NTFS USB File System can not be supported.
  - Depending on the manufacturer, the USB may not be supported.

## Product protection function

### Heat protection

- The protection function will come on if the main unit or power transformer overheats.

"PROTECTION" will appear in the display .

This function will come on :

- If speaker terminal is shorted
- If speaker cable is shorted

If there is no problem when you turn the unit on again after turning it off, PROTECTION mark will disappear on the display and the unit will work properly.

- If PROTECTION appears on the display, check whether the speaker terminal is shorted and then turn on the unit again.
