- 30 hours audio and 5 hours video playback
- Internal Lithium Polymer Rechargeable Battery
- Available in Black, Burgundy, White

The Samsung P2 is the first Samsung MP3 Widescreen (16x9) Video player with an optimized, touchscreen user interface. In addition, new to the lineup is Bluetooth functionality. The Bluetooth capability will enable the P2 to pair with other Bluetooth 2.0 devices. The P2 comes ready to pair with stereo Bluetooth 2.0 headphones and speaker systems to provide high quality wireless listening. Full integration with cell phones will be available via a firmware upgrade in November 2007.

Portable Multimedia

P2 Flash Memory Video MP3 Player

Video Playback

Plays MPEG4 and WMV9 video files in 16:9 DVD friendly format.
Samsung Multimedia Software included with the P2 transcodes the video on the computer before transferring to the P2, so videos on the P2 play at the optimal frame size/rate with minimal effort from the user. P2 will also playback at up to 30 frames per second, twice the category average!
Also get your videos from CinemaNow.com or Vongo.com

Music Playback and Capacity

Plays MP3, WMA, and OGG
MP3 files are the most common music format available today.
WMA uses a high quality compression technology so users can have smaller files that sound in near CD quality
Works with Rhapsody, Napster, and Yahoo! So users can download up to 4 million songs and take them on the P2 (separate subscription is required).

Capacity	Number of Songs MP3*/WMA**	Hours of Play* MP3*/WMA**
4GB	1,000/2,000	66/132
8GB	2,000/4,000	132/264

*MP3–128kbps/4 min per song CD Quality
**WMA–64kbps/4 min per song CD Quality

Photo Playback

Samsung Multimedia Software transfers JPEG images onto the P2 for viewing on the device. Images can be zoomed and re-centered. Any JPEG on the P2 can become the wallpaper during music playback.

FM Tuner

The built-in FM Tuner will scan the entire FM range in less than 60 seconds and automatically place the available FM stations into presets. To eliminate stations with marginal reception, users can adjust the sensitivity to only preset stations with strong reception.

Bluetooth 2.0

Bluetooth is a wireless standard which will enable the P2 to pair with other Bluetooth 2.0 devices. The range of the Bluetooth connection is 32.8 feet. P2 comes ready to pair with stereo Bluetooth 2.0 headphones and speaker systems to provide high quality wireless listening.
Integration with cell phones is ready via firmware upgrade in November 2007.
Bluetooth accessories sold separately.

Samsung P2

Text Viewer and File Browser

This allows users to view text files on the P2. Text color is customizable and can be viewed in a portrait or landscape view.
P2 also comes with a file viewer which allows for users to view and delete any file on the device without the PC.

3" Widescreen LCD with Touch Control

P2 Comes with a 3" WQVGA screen which allows for widescreen viewing in the DVD friendly 16:9 format.
The touch screen also reacts to consumer's gestures using EmoTure™, an input system built by Samsung that goes beyond just merely tapping selections. Users can utilize simple directional slides to easily interact with the menu (i.e. slide fingers across the screen right for FF or left for RW).

Built-in NAND Flash Memory

Samsung uses high-quality NAND flash memory for the P2. Because flash memory is static (no moving parts), battery life, menu speed, player size and weight, and player durability are greatly improved over devices which use hard drives.

Menu Structure of Key Functions

- Menu Select
  - Video
  - Music
  - Pictures
