Notice

While reasonable efforts were made to ensure that the information in this document was complete and accurate at the time of printing, Avaya Inc. can assume no liability for any errors. Changes and corrections to the information in this document may be incorporated in future releases.

For full support information, please see the complete document, *Avaya Support Notices for Software Documentation*, document number 03-600758.

To locate this document on our Web site, simply go to <http://www.avaya.com/support> and search for the document number in the search box.

Documentation disclaimer

Avaya Inc. is not responsible for any modifications, additions, or deletions to the original published version of this documentation unless such modifications, additions, or deletions were performed by Avaya. Customer and/or End User agree to indemnify and hold harmless Avaya, Avaya's agents, servants and employees against all claims, lawsuits, demands and judgments arising out of, or in connection with, subsequent modifications, additions or deletions to this documentation to the extent made by the Customer or End User.

Link disclaimer

Avaya Inc. is not responsible for the contents or reliability of any linked Web sites referenced elsewhere within this documentation, and Avaya does not necessarily endorse the products, services, or information described or offered within them. We cannot guarantee that these links will work all of the time and we have no control over the availability of the linked pages.

Warranty

Avaya Inc. provides a limited warranty on this product. Refer to your sales agreement to establish the terms of the limited warranty. In addition, Avaya's standard warranty language, as well as information regarding support for this product, while under warranty, is available through the following Web site: <http://www.avaya.com/support>.

Copyright

Except where expressly stated otherwise, the Product is protected by copyright and other laws respecting proprietary rights. Unauthorised reproduction, transfer, and or use can be a criminal, as well as a civil, offence under the applicable law.

Avaya support

Avaya provides a telephone number for you to use to report problems or to ask questions about your product. The support telephone number is 1-800-242-2121 in the United States. For additional support telephone numbers, see the Avaya Web site: <http://www.avaya.com/support>.

Initial Setup

From your iPhone, you use the Safari web browser to access the Avaya one-X™ Mobile application that resides on your corporate server. Before you can use the Avaya one-X Mobile application, you must set up your account. This chapter provides the procedure to set up your account and to log in to your corporate server the first time you open Avaya one-X Mobile on your iPhone.

Prerequisites

Before you set up your Avaya one-X Mobile account, you must:

- Ensure your mobile phone service is enabled for data service. The Avaya one-X Mobile client uses the carrier's data channel to communicate information to and from the iPhone. To protect yourself from unexpected data charges, also ensure that your data service plan provides for unlimited data usage at a fixed rate. Also, when you are travelling, familiarise yourself with the data roaming charges imposed by other mobile carriers.
- Know your mobile carrier, mobile device manufacturer (Apple) and model name (iPhone or iPod touch).
- Know the URL or IP address of the Avaya one-X Mobile server.
- Be familiar with the basic operation of your iPhone including opening the Safari web browser, navigating to web pages and adding bookmarks.

Set up your account

Before you begin using Avaya one-X Mobile on your iPhone, you must log in to the Avaya one-X Mobile Web site from your PC and set up your account. The procedures to log in to the Avaya one-X Mobile Web site for the first time and set up your account are provided in this section.

You will need to know the following information in order to successfully set up your account:

- your corporation's Avaya one-X Mobile Web site address or URL (for example, oneXMobile.yourcompanyname.com/iPhone)
- your corporate computer username and password
- unique ID for your desk phone (required only for shared extensions; appears on your desk phone screen)

Initial Setup

- your Unity Connections username and password (required only if your corporate voicemail system uses Unity Connections)
- your Avaya Modular Messaging mailbox password (required only if your corporate voicemail system uses Avaya Modular Messaging)
- phone number of the mobile phone you want to use with Avaya one-X Mobile
- mobile phone carrier
- mobile phone manufacturer (Apple)
- mobile phone model (iPhone or iTouch)

To log in to the Avaya one-X Mobile Web site for the first time and set up your account:

1. Open the web browser on your PC.
2. Using http or https as advised by your system administrator, go to your corporate URL for the Avaya one-X Mobile Server.

The Avaya one-X Mobile Web site login page appears.

3. In the **Username** field, enter your corporate computer username.
4. In the **Password** field, enter your corporate computer password.
5. Click the **Log In** button.
6. Enter the Modular Messaging password or Cisco PIN.

The End User Licence Agreement appears.

7. Read the licence agreement, and then click the **Accept** button.
8. Perform one or more of the following steps:
 - If you have a shared phone extension, you are prompted to identify your desk phone. Select the option that exactly matches the message on the screen of your desk phone, and then click the **OK** button.
 - If your corporate voicemail system uses Unity Connection, you are prompted for the Unity Connection username and password. Enter the Unity Connection username and password, and then click the **OK** button.

The Avaya one-X Mobile Setup page appears.

9. Enter your 10-digit mobile phone number, and then click the **Next** button.
10. Select your mobile carrier from the drop-down menu, and then click the **Next** button.
11. Select **Apple** from the manufacturer drop-down menu, and then click the **Next** button.
12. Select **iPhone** or **iTouch** from the mobile model drop-down menu, and then click the **Next** button.
13. Select your operating system from the drop-down menu, and then click the **Next** button.

The Avaya one-X Mobile Web Home page appears. See the *Avaya one-X™ Mobile Web User Guide*, document number 18-602150EN-GB, for more information.

Log in for first-time use

The first time you use the Avaya one-X Mobile application on your iPhone, you must log in with your corporate computer username and password.

Note:

Before you can log in to the Avaya one-X Mobile application on your iPhone, you must set up your account on Avaya one-X Mobile Web. If you have not done so already, see [Set up your account](#) on page 5.

To log in for the first time:

1. Open the Safari web browser on your iPhone.
2. Tap the address field at the top of the screen, and enter the URL or IP address of your corporation's Avaya one-X Mobile server.

Note:

See your system administrator for the URL for the Avaya one-X Mobile server.

3. Tap the **Username** field, and enter your corporate computer username.
4. Tap the **Password** field, and enter your corporate computer password.
5. Tap **Done** to dismiss the keyboard.
6. Tap **LogIn**.

The Avaya one-X Mobile Home screen appears, as shown on page 12.

7. Create a bookmark for this web page so you can quickly navigate to it the next time without having to type the address. See [Create a bookmark](#) on page 8.

Create a bookmark

You can create a bookmark or a web clip bookmark icon for the Avaya one-X Mobile web page so you can quickly navigate to it the next time without having to type the address. The web clip bookmark icon adds an Avaya one-X Mobile icon on the iPhone home screen.

To create a bookmark or a web clip bookmark icon:

1. Follow steps 1 to 6 in [Log in for first-time use](#) on page 7.
The Avaya one-X Mobile Home screen appears.
2. Do one of the following:
 - To create a bookmark in the web browser for this web page:
 - a. Tap **+** on the bottom navigation bar of the Safari browser window.
 - b. Tap **Add Bookmark**.
 - c. Tap **Save**.
 - To create a web clip bookmark icon on the iPhone home screen for this web page:
 - a. Tap **+** on the bottom navigation bar of the Safari browser window.
 - b. Tap **Add to Homescreen**.
 - c. Tap **Add**.

Note:

The **+** bookmark feature is only available on iPhones that are running Apple system software version 1.1.3 or above.

Getting Started

Avaya one-X Mobile equips your iPhone with access to your company's phone system. Regardless of your work location, you can receive and make calls to and from your office phone number, review voicemail messages in any order, look up information in your company's corporate directory and even block calls from everyone but the people you want to hear from most.

Avaya one-X Mobile includes Avaya one-X Mobile Web, a site hosted by your company's network that provides additional features to help you manage your work calls, availability and voicemail messages. This user guide describes how to use Avaya one-X Mobile. For more information about Avaya one-X Mobile Web, see [About Avaya one-X Mobile Web](#) on page 11 and the *Avaya one-X™ Mobile Web User Guide*, document number 18-602150EN-GB.

Key Features

Avaya one-X Mobile provides the following key features:

- **Visual Voicemail** — Visual Voicemail provides many of the best features of e-mail to the review and management of your office voicemail. Both the new and saved voicemail inboxes show the current state of the messages left in your office voicemail account. You can review in any order, listen to, save or delete voicemail messages in the Avaya one-X Mobile application. You can save the caller's phone number and mark them as a VIP in your Phonebook. You can also send an e-mail from the new or saved voicemail inbox to a contact who has left you a message. The voicemail in the Avaya one-X Mobile application is a reflection of the voicemail on your office phone. Any change made to the office voicemail is reflected in both the Avaya one-X Mobile application and in your office voicemail. See [Listening to Voicemail](#) on page 27 for more information.
- **Corporate Directory, Phonebook and Block** — You can wirelessly search your Corporate Directory from your iPhone and add corporate contact information to your Phonebook. In your Phonebook, you can designate key contacts—colleagues, clients, friends or family members—as VIPs. When the Block feature on the Avaya one-X Mobile Home screen is set to ON, VIPs ring through while all other callers are sent directly to your office voicemail. When set to OFF, no calls are blocked. All calls, including those from non-VIPs, ring through. See [Using the Corporate Directory](#) on page 43 and [Using the Phonebook](#) on page 37 for more information.

Getting Started

- **Send Calls** — The Send Calls feature routes all calls coming into your work number to one or more phones of your choice. With this feature, you need only one work phone number—rather than a home number, office number and hotel number while on business trips—to receive all your personal and business calls. When you are particularly busy, you can choose to send all work calls directly to your office voicemail system. Voicemail messages are left on your office voicemail system, not on the iPhone voicemail system. The Send Calls feature can also route calls to different phones automatically according to a schedule you define in Avaya one-X Mobile Web. See [Managing Incoming Calls Using the Send Calls Feature](#) on page 23 for more information.
- **Call Log** — The Call Log shows detailed information about calls to and from your work phone number, information that is especially useful if you bill directly for your time. From the Call Log, you can also add contact information directly to your Phonebook for use with the VIP and Block features, or directly initiate an Avaya one-X Mobile call to any caller or number you have called. See [Using the Call Log](#) on page 31 for more information.
- **Call Back** — The Avaya one-X Mobile Call Back feature allows you to place a call from any phone through your office phone system. This feature provides the following advantages:
 - Your caller ID is always your work phone number, regardless of the phone you are calling from—such as your mobile, home, hotel room or client’s conference room phones.
 - All calls placed using the Avaya one-X Mobile Call Back feature appear in your Call Log, making tracking and billing easier.
 - You can use any phone and still benefit from special rate plans for calls made from your office phone system.

See [Making Calls Using the Call Back Feature](#) on page 15 for more information.

About Avaya one-X Mobile Web

Avaya one-X Mobile Web extends the features of Avaya one-X Mobile by taking advantage of the larger computer screens and faster network connections available with laptop computers and desktop computers. Changes you make to settings, voicemail messages, calls and contact information on Avaya one-X Mobile Web will appear on Avaya one-X Mobile, and vice versa. You have already used Avaya one-X Mobile Web to sign up for the Avaya one-X Mobile service.

Avaya one-X Mobile Web also provides additional features not available in Avaya one-X Mobile. They are the ability to:

- Forward voicemail messages via e-mail
- Create and edit settings in Automatic by Schedule — a feature that manages your incoming calls according to a schedule you define

For more information about Avaya one-X Mobile Web, see the *Avaya one-X™ Mobile Web User Guide*, document number 18-602150EN-GB.

About this Guide

The procedures provided in this guide assume you are familiar with the basic operation of your iPhone including using the iPhone buttons and touchscreen, opening the Safari web browser and navigating to web pages. For information about how to perform these tasks, see the user guide that came with your iPhone.

Access the Application

To access the Avaya one-X Mobile application, do one of the following:

- To open the application using the web page bookmark:
 1. Open the Safari web browser on your iPhone.
The last web page you viewed appears.
 2. Tap the bookmark icon at the bottom of the screen.
 3. Tap the bookmark for **one-X Mobile**.
The Avaya one-X Mobile Home screen appears.
- To open the application using the web clip bookmark icon, tap the **one-X Mobile** icon on the iPhone home screen.
The Avaya one-X Mobile Home screen appears.

Note:

If you did not create a bookmark or web clip bookmark icon the first time you logged in to Avaya one-X Mobile, see [Create a bookmark](#) on page 8.

About the Avaya one-X Mobile Home screen

The Home screen shows:

- **Logout** button — logs you out of the Avaya one-X Mobile application. The next time you access the application, you will be prompted for your corporate computer username and password.
- **Call Back** button — opens an Avaya one-X Mobile Call Back screen from which you can make a call using the Call Back feature.
- **Phonebook**  — opens the Avaya one-X Mobile Phonebook.
- **Directory**  — allows you to wirelessly search your Corporate Directory from your iPhone.
- **Call Log**  — opens the Avaya one-X Mobile Call Log.
- **Saved VM**  — opens the Saved Voicemail inbox.
- **Refresh**  — updates all application data, inboxes and contacts.
- **New Voicemail** — shows the number of new voicemail messages in the New Voicemail inbox.
- **Block** — shows the current Block setting.
- **Send Calls to** — lists the phones currently designated to ring when a call comes in to your office phone.
 - If you have chosen to send all calls to voicemail, **Direct to Voicemail** appears and all calls, including those from VIPs, are sent directly to voicemail. Your phone will not ring.
 - If you have chosen to manage your Send Calls destinations according to a schedule you define through the Avaya one-X Mobile Web application, **Auto by Schedule** appears.
-  — shows the Setup options which allow you to change settings on your iPhone such as your contact sort order or voicemail notification preference.

By scrolling up above the Avaya one-X Mobile application, you can view the Safari browser controls. You may sometimes find it necessary to tap the Safari browser refresh button if poor network connections or software upgrades cause the Avaya one-X Mobile application to present incomplete data.

Making Calls Using the Call Back Feature

When you make a call from your iPhone using the Avaya one-X Mobile application, instead of placing the call through the mobile carrier, you use the Avaya one-X Mobile Call Back feature. The Call Back feature uses your office phone system (or PBX) as a bridge between the phone you want to use and the number you want to call. Although the phone you most frequently use will probably be your iPhone, you can use any of the phones included in your list of Send Calls destinations. See [Managing Incoming Calls Using the Send Calls Feature](#) on page 23 for more information about the Send Calls feature. In addition, the Call Back feature also provides Quick Entry, a feature that allows you to place a call from a phone that you want to use immediately, but are unlikely to use frequently in the future, for example, a direct-dial hotel room phone or a phone in a client's meeting room.

You can make a call using the Call Back feature from the following locations within the Avaya one-X Mobile application:

- Home screen
- New Voicemail inbox
- Saved Voicemail inbox
- Call Log
- Phonebook
- Corporate Directory search results

You begin a call by tapping either the **Call Back** or **Call** command, depending on where you initiate the call. On the Avaya one-X Mobile Home screen, the **Call Back** command allows you to make an ad hoc call back by entering the number you wish to call. From other locations when the **Call Back** command is selected, the number to be called is associated with the Voicemail, Call Log or contact entry that was highlighted when you selected **Call Back**. Once you have initiated the call, you are prompted to select the phone you want to use for this call. Although this will usually be your iPhone, it can be any phone. The selected phone rings. You answer the phone and press the **5** key, and then the call is connected. See [Overview of the Avaya one-X Mobile Call Back Feature](#) on page 16 for a further description of the Avaya one-X Mobile Call Back feature.

Overview of the Avaya one-X Mobile Call Back Feature

Step 1: Enter or select the number you want to call, and then select **Call Back**. This tells your corporate telephone system (or PBX) to initiate the call. (You can select **Call Back** from multiple locations within the Avaya one-X Mobile application. See the locations listed on the previous page.) After you select **Call Back**, you then select the phone you want to use. This will usually, but not always, be your iPhone.

Step 2: Your corporate telephone system calls the phone you selected to use. You answer the call and press the **5** key. The phone you answer the call on will usually be your iPhone, but it could be any phone included in your list of Send Calls destinations, such as your home phone or a hotel room phone. The following illustration shows your iPhone.

Step 3: While you wait, your corporate telephone system calls the person you want to talk to.

Step 4: You can begin talking after the other phone is answered by a person or voicemail system.

Make a call from the Home screen

When you make a call from the Home screen, you enter the number you want to call. This is different from making a call from your Call Log, Phonebook, Corporate Directory or Voicemail, where the number you are calling is selected from a particular screen. Making a call from the Home screen allows you to use the Avaya one-X Mobile Call Back feature with a number that is not in your Call Log, Phonebook, Corporate Directory, or Voicemail.

To make a call from the Avaya one-X Mobile Home screen:

1. On the Avaya one-X Mobile Home screen, tap **Call Back**.
The Call Back screen appears.
2. Tap **Number to Call**.
3. Tap the text field to bring up the keyboard, and then enter the number you want to call.
4. Tap **Done** to dismiss the keyboard.
5. Tap **Call Back** to return to the Call Back screen.
6. Tap **Destination**.
7. Tap the phone you want to use to make the call. This is one of the phones included in your Send Calls destinations.
A tick indicates the selected phone.
8. Tap **Call Back** to return to the Call Back screen.
9. Tap **Call**.
The call is initiated and the instructions screen appears.
10. Answer your phone and then press the **5** key, as instructed on the Call Back screen.
11. Wait a moment. Your office phone system will connect you to the number you have have called.

Make a call from your New Voicemail inbox

To make a call from your new voicemail inbox to someone who left you a message:

1. On the Avaya one-X Mobile Home screen, tap **New Voicemail**.
The New Voicemail inbox appears. Each voicemail entry shows the time or date of the call.
2. To listen to the message before making the call, tap the voicemail icon for the message you want to hear.

Making Calls Using the Call Back Feature

Note:

To make the call without listening to the message, tap the name or number to highlight it, and then go to step 5.

The standard Quicktime player opens and the message plays.

3. Tap **Back** when you are finished listening to the message.

The New Voicemail inbox appears.

4. Tap the name or number to highlight the entry.

5. Tap **Call Back**.

The Call Back screen appears.

6. Tap **Destination**.

7. Tap the phone you want to use to make the call. This is one of the phones included in your Send Calls destinations.

A tick indicates the selected phone.

8. Tap **Call Back** to return to the Call Back screen.

9. Tap **Call**.

The call is initiated and the instructions screen appears.

10. Answer your phone and then press the **5** key, as instructed on the Call Back screen.

11. Wait a moment. Your office phone system will connect you to the number you have called.

Make a call from the Call Log

To make a call to a person or number in the Call Log:

1. From the Avaya one-X Mobile Home screen, tap  **Call Log**.

The Call Log appears.

2. Tap the number or name you want to call to highlight the entry.

3. Tap **Call Back**.

The Call Back screen appears.

4. Tap **Destination**.

5. Tap the phone you want to use to make the call. This is one of the phones included in your Send Calls destinations.

A tick indicates the selected phone.

6. Tap **Call Back** to return to the Call Back screen.

7. Tap **Call**.
The call is initiated and the instructions screen appears.
8. Answer your phone and then press the **5** key, as instructed on the Call Back screen.
9. Wait a moment. Your office phone system will connect you to the number you have called.

Make a call from your Phonebook

To make a call to a contact in your Phonebook:

1. On the Avaya one-X Mobile Home screen, tap  **Phonebook**.
The Phonebook appears. A star indicates the contact is designated as a VIP.
2. Tap the contact you want to call.
The Information screen appears.
3. Tap the number you want to call.
The Call Back screen appears.
4. Tap **Destination**.
5. Tap the phone you want to use to make the call. This is one of the phones included in your Send Calls destinations.
A tick indicates the selected phone.
6. Tap **Call Back** to return to the Call Back screen.
7. Tap **Call**.
The call is initiated and the instructions screen appears.
8. Answer your phone and then press the **5** key, as instructed on the Call Back screen.
9. Wait a moment. Your office phone system will connect you to the number you have called.

Make a call from the Corporate Directory

To make a call to a person in your Corporate Directory:

1. On the Avaya one-X Mobile Home screen, tap  **Directory**.
The directory search screen appears.
2. Tap the search text box to bring up the keyboard.

Making Calls Using the Call Back Feature

3. Enter the first few letters of the contact's first or last name.
4. Tap **Search**.
The search results appear.
5. Tap the name of the person you want to call.
The Information screen appears showing the complete contact record.
6. Tap the number you want to call.
The Call Back screen appears.
7. Tap **Destination**.
8. Tap the phone you want to use to make the call. This is one of the phones included in your Send Calls destinations.
A tick indicates the selected phone.
9. Tap **Call Back** to return to the Call Back screen.
10. Tap **Call**.
The call is initiated and the instructions screen appears.
11. Answer your phone and then press the **5** key, as instructed on the Call Back screen.
12. Wait a moment. Your office phone system will connect you to the number you have called.

Make a call from a Quick Entry number

Use the Quick Entry feature to make a call from a phone that is not in your list of Send Calls destinations. For example, you may want to use a phone in a hotel conference room. The Quick Entry feature allows you to directly enter the number of the phone you want to use.

Note:

The procedure provided below describes how to make a Quick Entry Call Back from the Home screen. However, you can make a Quick Entry Call Back from any screen that supports the **Call Back** command, for example the Call Log or Voicemail inbox screens.

To make a call from the Home screen using a temporary phone:

1. On the Avaya one-X Mobile Home screen, tap **Call Back**.
The Call Back screen appears.
2. Tap **Number to Call**.
3. Tap the text field to bring up the keyboard, and then enter the number you want to call.
4. Tap **Done** to dismiss the keyboard.

5. Tap **Call Back** to return to the Call Back screen.
6. Tap **Destination**.
The Destinations screen appears.
7. Tap **Quick Entry**.
8. Tap the text field to bring up the keyboard, and then enter the Quick Entry number.
9. Tap **Done** to dismiss the keyboard.
10. Tap **Back** > **Call Back** to return to the Call Back screen.
11. Tap **Call**.
The call is initiated and the instructions screen appears.
12. Answer your phone and then press the **5** key, as instructed on the Call Back screen.
13. Wait a moment. Your office phone system will connect you to the number you have called.

Switch from your iPhone to your office phone

Avaya one-X Mobile uses Extension to Cellular, a feature which allows your iPhone to function as an extension of your office phone. Extension to Cellular provides the capability to switch between your iPhone and your office phone during an ongoing Extension to Cellular call. For example, you receive a call on your iPhone on your way into work. The call continues as you arrive at your office and proceed to your desk. At that point, you would like to use your office phone to continue the call (this saves additional mobile phone charges).

Note:

Extension to Cellular works wherever your iPhone currently works. You may lose iPhone calls while in your building because of poor reception. Optional installation of a distributed antenna system (DAS) in buildings with poor mobile reception has proved to be an effective solution. Ask your system administrator to contact Avaya for details.

Note:

This procedure applies to incoming calls picked up on your iPhone when Avaya one-X Mobile is used. This procedure also applies to outgoing calls if you have placed an Avaya one-X Mobile call from your iPhone.

To switch to the office phone while on your iPhone with an Avaya one-X Mobile call:

1. Pick up the office phone handset or turn the speaker on.
2. Press the lighted Call Appearance (line indicator) button on your office phone that shows the line that is currently in use.

You are now conferenced onto the existing call.

Making Calls Using the Call Back Feature

3. Disconnect your iPhone from the call by pressing the appropriate End Call button on your iPhone.
4. Continue speaking using your office phone handset or speaker.

Switch from your office phone to your iPhone

Avaya one-X Mobile uses Extension to Cellular, a feature which allows your iPhone to function as an extension of your office phone. Extension to Cellular provides the capability to switch between your office phone and your iPhone during an ongoing Extension to Cellular call. For example, you receive a call on your office phone before leaving work. The mobile continues as you want to leave your office. At that point, you would like to use your iPhone to continue the call.

Note:

Extension to Cellular works wherever your iPhone currently works. You may lose iPhone calls while in your building because of poor reception. Optional installation of a distributed antenna system (DAS) in buildings with poor mobile reception has proved to be an effective solution. Ask your system administrator to contact Avaya for details.

Ensure you notify the person with whom you are speaking that you will be changing phones.

To switch to your iPhone while you are on your office phone with an Avaya one-X Mobile call:

1. Turn on your iPhone.
2. Extend the call to your iPhone in one of the following two ways:
 - Press the administered **Extend Call** button on your office phone (if your office phone supports administered feature buttons). The **Extend Call** button extends the call to any Extended Access phones mapped to your office phone. For more information on this button, contact your system administrator.
 - From your iPhone, dial the Active Appearance Select feature name extension (FNE) to extend the call to your iPhone. For a list of the feature name extensions for your system, contact your system administrator.

You are now conferenced onto the existing call.

3. Hang up your office phone.
4. Continue speaking using your iPhone.

Managing Incoming Calls Using the Send Calls Feature

The Avaya one-X Mobile Send Calls feature routes incoming calls to your office number out to one or more phones of your choice. If you are unable to answer a work call—regardless of where it is being sent—the call is automatically directed back to your office voicemail system. Work messages will not end up in your iPhone, home or hotel room voicemail.

About Send Calls Destinations

Your office phone system routes calls to your work number to the Send Calls destinations you select. The Send Calls destinations are described below.

- **Office and Mobile Destinations** — are automatically created when you sign up for the Avaya one-X Mobile service. Select the Office destination if you want your office phone to ring when someone calls your work number. Select the Mobile destination if you want your iPhone to ring when someone calls your work number. Select both if you want both phones to ring.
- **Custom Destinations** — are created and edited through the Avaya one-X Mobile Web application. *Home* is an example of a custom destination you will probably want to create. If you are working at home, you can have all your office calls routed to your home number. You can create any number of custom destinations. See the *Avaya one-X™ Mobile Web User Guide*, document number 18-602150EN-GB, for more information.
- **Quick Entry** — is a feature that allows you to add one phone number to which you can temporarily receive calls. This is typically a phone that you want to use immediately, but are unlikely to use frequently in the future—for example, a restaurant phone, a direct-dial hotel room phone or a phone in a client’s meeting room. Quick Entry allows you to send calls to an infrequently used number without having to create a custom destination through the Avaya one-X Mobile Web application. You are prompted for a phone number every time you use Quick Entry. Quick Entry remembers the last phone number you entered, but you can easily delete it and enter a new number.
- **Automatic by Schedule** — manages your Send Calls destinations according to a schedule you define through the Avaya one-X Mobile Web application. For example, work calls can be sent automatically to your mobile phone during your morning commute, to your office and mobile phone during the work day, to voicemail during lunch, and back to your mobile phone during your drive home. No other Send Calls destinations can be selected when Automatic by Schedule is in effect. See the *Avaya one-X™ Mobile Web User Guide*, document number 18-602150EN-GB, for more information.

- **Direct to Voicemail** — sends all calls directly to your office voicemail. No phones will ring. No other Send Calls destinations can be selected when the Voicemail destination is in effect. The Voicemail destination, when selected, overrides but does not change the Block setting and all callers, even VIPs, will be sent directly to voicemail.

Select the phones to which calls are routed

You can select up to five phones (unless limited by your system administrator) to ring simultaneously when a call comes in to your office number.

Note:

You must select at least one phone destination. All calls are sent to the Office destination by default if no destinations are selected.

To select the phones to which office calls are routed:

1. On the Avaya one-X Mobile Home screen, tap **Send Calls to**.

A list of the phones on which you can receive office calls appears. **Direct to Voicemail** and **Auto by Schedule** are also listed.

2. Tap the tick box to select or de-select the appropriate phones. A tick appears in the tick box when the destination is selected.

Note:

Depending on your communication system, the **Office** phone must be a destination and cannot be de-selected. In this case, the tick appears light grey.

3. Tap **Home** to save your changes.

The Home screen appears. The Send Calls destinations you selected appear on the Home screen.

To add another phone on which you can receive office calls, you must use the Avaya one-X Web application. See the *Avaya one-X™ Web User Guide*, document number 18-602150EN-GB, for more information.

Set a Quick Entry number to which calls are routed

Your Send Calls destinations are created and edited through the Avaya one-X Web application. But the Quick Entry feature provided by the Avaya one-X Mobile application allows you to designate one phone on which you can receive calls on a temporary basis.

To add a temporary phone to which an office call is routed one time:

1. On the Avaya one-X Mobile Home screen, tap **Send Calls to**.

A list of the phones on which you can receive office calls appears. **Direct to Voicemail** and **Auto by Schedule** are also listed.

2. Tap the tick box for **Quick Entry**.

The Quick Entry screen appears. Quick Entry remembers the last phone number you entered.

3. Do one of the following:

- To use the current Quick Entry number, tap **Send Calls** to return to the Send Calls screen.
- To use a different Quick Entry number:
 - a. Tap the text field to bring up the keyboard.
 - b. Enter the new Quick Entry number.
 - c. Tap **Send Calls** to return to the Send Calls screen.

4. Tap **Home** to return to the Avaya one-X Mobile Home screen.

The Quick Entry number appears as a Send Calls destination.

Send all calls to Voicemail

From your iPhone, you can choose to send all incoming calls to your office number directly to your office voicemail—no phones will ring. The voicemail destination, when selected, overrides your Block setting so that all callers, including VIP callers, are sent to your office voicemail.

Note:

No other Send Calls destinations can be selected when the Voicemail destination is in effect.

To send all calls to your office voicemail:

1. On the Avaya one-X Mobile Home screen, tap **Send Calls to**.

A list of the phones on which you can receive office calls appears. **Direct to Voicemail** and **Auto by Schedule** are also listed.

Managing Incoming Calls Using the Send Calls Feature

2. Tap the tick box for **Direct to Voicemail**.

A tick appears in the **Direct to Voicemail** tick box. All other destinations are automatically unticked.

3. Tap **Home**.

The Home screen appears. **Direct to Voicemail** appears as the Send Calls destination.

Route calls as defined by Automatic by Schedule

Automatic by Schedule manages your incoming calls according to a schedule you define through the Avaya one-X Mobile Web application. For information on how to create or edit an automatic schedule, see the *Avaya one-X™ Mobile Web User Guide*, document number 18-602150EN-GB.

Note:

No other Send Calls destination can be selected when Automatic by Schedule is in effect.

To manage your incoming calls according to the schedule defined in Automatic by Schedule:

1. On the Avaya one-X Mobile Home screen, tap **Send Calls to**.

A list of the phones on which you can receive office calls appears. **Direct to Voicemail** and **Auto by Schedule** are also listed.

2. Tap the tick box for **Auto by Schedule**.

A tick appears in the **Auto by Schedule** tick box. All other destinations are automatically unticked.

3. Tap **Home**.

The Home screen appears. **Auto by Schedule** appears as the Send Calls destination. The current time period and the call destinations selected for the current time period are also shown.

Listening to Voicemail

Avaya one-X Mobile Visual Voicemail provides many of the best features of e-mail to the review and management of your office voicemail. The New Voicemail and Saved Voicemail inboxes display your messages similar to e-mail. You can see which messages are new and which have already been heard, as well as who left a message and when. This helps you review important messages first, and even save or delete messages without listening to them. You are also able to send an e-mail to someone who left you a voicemail message.

Note:

You cannot listen to office voicemail if the Avaya one-X Mobile Server is secure (https). If the server on which the Avaya one-X Mobile application is installed is a secure server, when you tap on the voicemail icon in the New or Saved Voicemail inbox, instead of the voicemail playing, a screen appears that allows you to call Corporate Voicemail directly. See [Change the Corporate Voicemail extension](#) on page 45 for more information.

The New Voicemail inbox and Saved Voicemail inbox display the icons shown in the following table.

New and Saved Voicemail Inbox Icons

| Icon | Description |
|---|-------------------|
|  | Unheard voicemail |
|  | Heard voicemail |

Listen to a new voicemail message

To listen to a new voicemail message:

1. On the Avaya one-X Mobile Home screen, tap **New Voicemail**.

The New Voicemail inbox appears. Each voicemail entry shows the time or date of the call. See [New and Saved Voicemail Inbox Icons](#) on page 27 for a description of the icons that appear next to each voicemail entry.

2. Tap  for the message you want to hear.

The standard Quicktime player opens and the message plays. When finished, the Quicktime player closes, and the information screen appears.

Listening to Voicemail

3. Do one of the following:

- Tap  to hear the voicemail message again.
- Tap **Save Voicemail** to move the message to the Saved VM inbox.
- Tap **Delete Voicemail** to delete the voicemail message from the New Voicemail inbox.
- Tap **Save Contact** to save this contact to your Phonebook.

A new contact screen appears. See [Add a Phonebook contact](#) on page 38 for more information.

To make a call to the party that left you the voicemail, see [Make a call from your New Voicemail inbox](#) on page 17.

Note:

A caller may leave a message that exceeds your phone's memory and can not be played in Avaya one-X Mobile. If that occurs, you will see a text alert when you attempt to play the message. You will be prompted to dial your office voicemail system directly.

Listen to a saved voicemail message

To listen to a saved voicemail message:

1. On the Avaya one-X Mobile Home screen, tap  **Saved VM**.

The Saved VM inbox appears. Each voicemail entry shows the time or date of the call. See [New and Saved Voicemail Inbox Icons](#) on page 27 for a description of the icons that appear next to each voicemail entry.

2. Tap  for the message you want to hear.

The standard Quicktime player opens and the message plays. When finished, the Quicktime player closes, and the information screen appears.

3. Do one of the following:

- Tap  to hear the voicemail message again.
- Tap **Delete Voicemail** to delete the voicemail message.

4. Tap **Saved VM** to return to the Saved VM inbox.

Save a voicemail message

The length of time you can keep saved voicemail messages is set by your office voicemail system. See your system administrator for more information.

To save a voicemail message without listening to it:

1. On the Avaya one-X Mobile Home screen, tap **New Voicemail**.
The New Voicemail inbox appears. Each voicemail entry shows the time or date of the call. See [New and Saved Voicemail Inbox Icons](#) on page 27 for a description of the icons that appear next to each voicemail entry.
2. Tap  for the message you want to save.
The information screen appears.
3. Tap **Save Voicemail**.
The voicemail message is moved from the New Voicemail inbox to the Saved VM inbox.

Delete a voicemail message

To delete a voicemail message without listening to it:

1. On the Avaya one-X Mobile Home screen, tap **New Voicemail** or  **Saved VM**.
The New Voicemail inbox or Saved VM inbox appears. Each voicemail entry shows the time or date of the call. See [New and Saved Voicemail Inbox Icons](#) on page 27 for a description of the icons that appear next to each voicemail entry.
2. Tap  for the message you want to delete.
The information screen appears.
3. Tap **Delete Voicemail**.
The voicemail message is deleted, and you return to the Home screen. The voicemail call information (who called and when) remains in the Call Log.

Save a contact to your Phonebook

From your voicemail inbox, you can add the person who left you a message to your Phonebook.

To add a contact from your new voicemail inbox to your Phonebook:

1. On the Avaya one-X Mobile Home screen, tap **New Voicemail**.
The New Voicemail inbox appears. Each voicemail entry shows the time or date of the call. See [New and Saved Voicemail Inbox Icons](#) on page 27 for a description of the icons that appear next to each voicemail entry.
2. Tap  for the appropriate contact.
The information screen appears.
3. Tap **Save Contact**.
A new contact screen appears. See [Add a Phonebook contact](#) on page 38 for more information.

Send an e-mail to a contact

If the e-mail address of the contact who left you the voicemail is known, from the voicemail inbox you can send an e-mail to the contact.

Note:

Your e-mail account on the iPhone must be set up in order for this feature to work.

To send an e-mail message from your New Voicemail inbox to a contact who left you a voicemail message:

1. On the Avaya one-X Mobile Home screen, tap **New Voicemail**.
The New Voicemail inbox appears. Each voicemail entry shows the time or date of the call. See [New and Saved Voicemail Inbox Icons](#) on page 27 for a description of the icons that appear next to each voicemail entry.
2. Tap  for the appropriate contact.
The information screen appears.
3. Tap the contact's e-mail address.
A new e-mail message appears with the address in the recipient field.
4. Complete the e-mail message as appropriate.

Using the Call Log

The Call Log shows detailed information about calls to and from your work phone number. Icons indicate whether the call was an outgoing or incoming call, a failed call, or whether the call has an associated voicemail message. From the Call Log, you can add contact information directly to your Phonebook and mark the contact as a VIP for use with the Block feature. When the Block feature is set to ON, VIPs ring through while all other callers are sent directly to your office voicemail. When set to OFF, no calls are blocked. From the Call Log, you can directly initiate an Avaya one-X Mobile call to any caller or number you called and also manage your voicemail messages.

The Call Log displays the icons shown in the following table.

Call Log Icons

| Icon | Description |
|---|-------------------|
|  | Incoming call |
|  | Outgoing call |
|  | Unheard voicemail |
|  | Heard voicemail |
|  | Failed call |

View the Call Log

To open the Call Log and view call information:

1. From the Avaya one-X Mobile Home screen, tap  **Call Log**.

The Call Log appears. Each entry shows the time or date of the call and the call type. See [Call Log Icons](#) on page 31 for a description of the icons that appear next to each entry in the Call Log.

2. To view additional information about a call, scroll to the appropriate call.
3. Tap  next to the call.

The Information screen shows the name and number of the caller or of the person you called (if known), the call type, the time and date of the call and call duration.

To make a call from your Call Log, see [Make a call from the Call Log](#) on page 18.

Delete a call

To delete a call from the Call Log:

1. From the Avaya one-X Mobile Home screen, tap  **Call Log**.
The Call Log appears.
2. Scroll to the call you want to delete.
3. Tap  next to the call.
The Information screen appears.
4. Tap **Delete Call**.
The call is deleted from the Call Log and you return to the Home screen.

Save a contact to your Phonebook

To add a contact from the Call Log to your Phonebook:

1. From the Avaya one-X Mobile Home screen, tap  **Call Log**.
The Call Log appears.
2. Scroll to the contact you want to add to your Phonebook.
3. Tap  next to the call.
The Information screen appears.
4. Tap **Save Contact**.
The Edit screen appears.
5. Tap the first text box.
The Name screen appears.
6. Tap the **first name** text box, and then enter the contact's first name.
7. Tap the **last name** text box, and then enter the contact's last name.
8. Tap **Done** to dismiss the keyboard.
9. Tap **Edit** to return to the Edit screen.
10. Tap the text box for the next field you want to complete.
11. Tap the text box to bring up the keyboard, and then enter the information.
12. Tap **Done** to dismiss the keyboard.

13. Tap **Edit** to return to the Edit screen.
14. Repeat steps 10 to 13 for each field on the Edit screen you want to complete.
15. To mark this contact as a VIP, in the **vip** field, tap the **OFF** button to turn the VIP status to **ON**.

Note:

If marked as a VIP, this contact will be able to ring through when the Block feature is set to ON. See [Change the Block setting](#) on page 41 for more information.

16. Tap **Save** when finished.

The contact is added to your Phonebook and you return to the Information screen.

Managing voicemail from the Call Log

If voicemail is associated with a call in the Call Log, you can listen to, save or delete the voicemail associated with the call. When you delete or save a voicemail from the Call Log, the message is saved or deleted, but the call remains in the Call Log. A voicemail icon next to the call indicates the call has voicemail associated with it.

Note:

You cannot listen to office voicemail if the Avaya one-X Mobile Server is secure (https). If the server on which the Avaya one-X Mobile application is installed is a secure server, when you tap on the voicemail icon in the Call Log, instead of the voicemail playing, a screen appears that allows you to call Corporate Voicemail directly. See [Change the Corporate Voicemail extension](#) on page 45 for more information.

Listen to a voicemail message from the Call Log

To listen to a voicemail message from the Call Log:

1. From the Avaya one-X Mobile Home screen, tap  **Call Log**.
The Call Log appears.
2. Scroll to the call with the voicemail you want to hear. A voicemail icon appears next to the call if there is voicemail associated with the call.
3. Tap  or  next to the call.

The standard Quicktime player opens and the message begins to play. When the message is finished playing, the information screen appears.

Using the Call Log

4. Do one of the following:
 - Tap **Save Voicemail** (new voicemail only) to move the message to the Saved VM inbox.
 - Tap **Delete Voicemail** to delete the voicemail message.
 - Tap **Delete Call** to delete both the call record and voicemail message.

Save a voicemail message from the Call Log

To save a new voicemail message from the Call Log without listening to it:

1. From the Avaya one-X Mobile Home screen, tap  **Call Log**.
The Call Log appears.
2. Scroll to the call with the voicemail you want to save. A voicemail icon appears next to the call if there is voicemail associated with the call.
3. Tap  next to the call.
The information screen appears.
4. Tap **Save Voicemail**.
The voicemail message is moved to the Saved VM inbox and you return to the Home screen.

Delete a voicemail message from the Call Log

You can delete the voicemail message only, leaving the call record in the Call Log, or you can delete both the voicemail message and the call record from the Call Log.

To delete a voicemail message from the Call Log without listening to it:

1. From the Avaya one-X Mobile Home screen, tap  **Call Log**.
The Call Log appears.
2. Scroll to the call with the voicemail you want to delete. A voicemail icon appears next to the call if there is voicemail associated with the call.
3. Tap  next to the call.
The information screen appears.

4. Do one of the following:

- Tap **Delete Voicemail**.

The voicemail message is deleted and you return to the Home screen. The call record remains in the Call Log, and instead of a voicemail icon, an incoming call icon appears next to the call.

- Tap **Delete Call**.

The voicemail message and the call record is deleted, and you return to the Home screen.

Using the Phonebook

The Avaya one-X Mobile Phonebook provides two important features to help you manage your work calls. First, you can add contacts from your company's Corporate Directory directly into the Phonebook (you can also manually enter contact information for friends and family). Second, you can designate specific Phonebook contacts as VIPs for use in conjunction with the Block feature. When the Block feature is set to block non-VIP callers, a VIP caller can ring through while all other callers are sent directly to your office voicemail.

The first time you use the Avaya one-X Mobile Phonebook, you are able to import contacts from your iPhone's local phonebook. Information stored in the Avaya one-X Mobile Phonebook is not available from the iPhone's native dialler.

Note:

You can add, edit and delete Phonebook contacts with the Avaya one-X Mobile Web application. Rather than use a small keypad, it may be easier to perform these tasks from the Web application where you can use a PC keyboard.

View your Phonebook contacts

To view the contacts in your Phonebook:

1. On the Avaya one-X Mobile Home screen, tap  **Phonebook**.
Your Phonebook contacts appear. A star identifies contacts marked as VIPs.
2. Scroll through the list to view your contacts.
3. To view contact details, tap the contact.
The Information screen appears.

To make a call to a contact in your Phonebook, see [Make a call from your Phonebook](#) on page 19.

Search your Phonebook for a contact

To search your Phonebook for a contact:

1. On the Avaya one-X Mobile Home screen, tap  **Phonebook**.
Your Phonebook contacts appear. A star identifies contacts marked as VIPs.

Using the Phonebook

2. Tap the search field to bring up the keyboard.
3. Enter the first few letters of the contact's first or last name, depending on how the Sort Order is set. For information about the Sort Order setting, see [Change the Sort Order setting](#) on page 47.
4. Tap **Search**.

The contacts that match your search criteria appear.

To make a call to a contact in your Phonebook, see [Make a call from your Phonebook](#) on page 19.

Add a Phonebook contact

To add a contact to your Phonebook:

1. On the Avaya one-X Mobile Home screen, tap  **Phonebook**.
Your Phonebook contacts appear. A star identifies contacts marked as VIPs.
2. Tap **+**.
The Edit screen appears.
3. Tap the first text box.
The Name screen appears.
4. Tap the **first name** text box, and then enter the contact's first name.
5. Tap the **last name** text box, and then enter the contact's last name.
6. Tap **Done** to dismiss the keyboard.
7. Tap **Edit** to return to the Edit screen.
8. Tap the text box for the next field you want to complete.
9. Tap the text box to bring up the keyboard, and then enter the information.
10. Tap **Done** to dismiss the keyboard.
11. Tap **Edit** to return to the Edit screen.
12. Repeat steps 8 to 11 for each field on the Edit screen you want to complete.
13. To mark this contact as a VIP, in the **vip** field, tap the **OFF** button to turn the VIP status to **ON**.

Note:

If marked as a VIP, this contact will be able to ring through when the Block feature is set to ON. See [Change the Block setting](#) on page 41 for more information.

14. Tap **Save** when finished.
The new contact is added to your Phonebook.

Delete a Phonebook contact

To delete a contact from your Phonebook:

1. On the Avaya one-X Mobile Home screen, tap  **Phonebook**.
Your Phonebook contacts appear. A star identifies contacts marked as VIPs.
2. Tap the contact you want to delete.
The Information screen appears.

Note:

To search for the contact, see [Search your Phonebook for a contact](#) on page 37.

3. Tap **Edit**.
The Edit screen appears.
4. Tap **Delete Contact**.
The contact is deleted and you return to the Phonebook.

Edit a Phonebook contact

To edit a contact in your Phonebook:

1. On the Avaya one-X Mobile Home screen, tap  **Phonebook**.
Your Phonebook contacts appear. A star identifies contacts marked as VIPs.
2. Tap the contact you want to edit.
The Information screen appears.

Note:

To search for the contact, see [Search your Phonebook for a contact](#) on page 37.

3. Tap **Edit**.
The Edit screen appears.
4. Tap the box for the information you want to edit.
5. Tap the text box to bring up the keyboard.
6. Edit the information as appropriate.

7. Tap **Done** to dismiss the keyboard.
8. Tap **Edit** to return to the Edit screen.
9. Tap **Save** when finished.

Change VIP status of a Phonebook contact

Designate specific Phonebook contacts as VIPs for use in conjunction with the Block feature. When the Block feature is set to ON, a VIP can ring through while all other callers are sent directly to your office voicemail. See [Change the Block setting](#) on page 41 for more information.

To change the VIP status of a contact in your Phonebook:

1. On the Avaya one-X Mobile Home screen, tap  **Phonebook**.
Your Phonebook contacts appear. A star identifies contacts marked as VIPs.
2. Tap the contact you want to edit.
The Information screen appears.

Note:

To search for the contact, see [Search your Phonebook for a contact](#) on page 37.

3. Tap **Edit**.
The Edit screen appears.
4. In the **vip** box, tap the **ON/OFF** toggle button to turn the VIP status **ON** or **OFF**.

Note:

If marked as a VIP, this contact will be able to ring through when the Block feature is set to ON. See [Change the Block setting](#) on page 41 for more information.

5. Tap **Save**.
The contact's VIP status is changed, and you return to the Phonebook.

Send an e-mail to a Phonebook contact

If an e-mail address is included in the contact's Phonebook information, you can send an e-mail to the contact from the Avaya one-X Mobile Phonebook.

Note:

Your e-mail account on the iPhone must be set up in order for this feature to work.

To send an e-mail to a contact in your Phonebook:

1. On the Avaya one-X Mobile Home screen, tap  **Phonebook**.
Your Phonebook contacts appear. A star identifies contacts marked as VIPs.
2. Tap the contact to whom you want to send an e-mail.

The Information screen appears.

Note:

To search for the contact, see [Search your Phonebook for a contact](#) on page 37.

3. Tap the contact's e-mail address.
A new e-mail message appears with the address in the recipient field.
4. Complete the e-mail message as appropriate.

Change the Block setting

The Block feature allows you to receive calls only from contacts you have designated as VIPs. The Block feature can be set to OFF or ON. When the Block feature is set to OFF, all callers can ring through. When the Block feature is set to ON, only VIP callers can ring through while all other callers are sent directly to your office voicemail. You designate contacts as VIPs in your Phonebook. See [Change VIP status of a Phonebook contact](#) on page 40.

To change the block setting, in the **Block** field on the Avaya one-X Mobile Home screen, tap the **ON/OFF** button to toggle between the two settings.

- When set to **OFF**, no calls are blocked. All calls, including those from non-VIPs, ring through.
- When set to **ON**, only calls from people you have designated as VIPs in your Phonebook ring through. All other callers are sent to your office voicemail.

Using the Corporate Directory

The Avaya one-X Mobile Corporate Directory feature lets you search your company's Corporate Directory from your iPhone for contact information for anyone in your group, department or company. The search results are displayed on your iPhone where you can add the contact to your Phonebook or place a call to the contact.

Search Corporate Directory for contact

To search the Corporate Directory for a contact:

1. On the Avaya one-X Mobile Home screen, tap  **Directory**.
The directory search screen appears.
2. Tap the search text box to bring up the keyboard.
3. Enter the first few letters of the contact's first or last name.
4. Tap **Search**.
The search results appear.
5. Tap the contact to view the complete contact record.

To make a call to a contact in your Corporate Directory, see [Make a call from the Corporate Directory](#) on page 19.

Save a Directory contact to your Phonebook

In order to add a Corporate Directory contact to your Phonebook, you must first search for the contact.

To add a Corporate Directory contact to your Phonebook:

1. On the Avaya one-X Mobile Home screen, tap  **Directory**.
The directory search screen appears.
2. Tap the search text box to bring up the keyboard.
3. Enter the first few letters of the contact's first or last name.

Using the Corporate Directory

4. Tap **Search**.
The search results appear.
5. Tap the contact to view the complete contact record.
6. Tap **Save Contact**.
The Edit screen appears with all known information about this contact completed.
7. Tap the text box for the next field you want to complete.
8. Tap the text box to bring up the keyboard, and then enter the information.
9. Tap **Done** to dismiss the keyboard.
10. Tap **Edit** to return to the Edit screen.
11. Repeat steps 7 to 10 for each field on the Edit screen you want to complete.
12. To mark this contact as a VIP, in the **vip** field, tap the **OFF** button to turn the VIP status to **ON**.
Note:
If marked as a VIP, this contact will be able to ring through when the Block feature is set to ON. See [Change the Block setting](#) on page 41 for more information.
13. Tap **Save** when finished.
The Corporate Directory contact is added to your Phonebook.

Changing the Avaya one-X Mobile Settings

This chapter provides procedures for adjusting settings that affect the behaviour of your Avaya one-X Mobile service. For example, you can enable voicemail notification so that you receive an SMS on your iPhone when new voicemail arrives in your corporate voicemail inbox.

Change the Corporate Voicemail extension

Avaya one-X Mobile provides a visual voicemail user interface to facilitate easy review and management of your office voicemail. However, under some circumstances such as space limitations on your iPhone or if your corporate Avaya one-X Mobile Server is secure (https), the Avaya one-X Mobile client will not be able to download voicemail to your mobile device. For these conditions, the corporate voicemail extension option is provided to call the corporate voicemail system directly. When you tap on the voicemail icon in the New or Saved Voicemail inbox or in the Call Log inbox, instead of the voicemail playing, a screen appears that allows you to call Corporate Voicemail.

To enter or edit a corporate voicemail call-in number that is appropriate for your office voicemail account:

1. On the Avaya one-X Mobile Home screen, tap  .
The current Corporate VM extension appears on the Setup screen.
2. Tap **Corporate VM**.
3. Tap the text field to bring up the keyboard.
4. Edit or enter your corporate voicemail extension.
5. Tap **Setup** to return to the Setup screen.
The new corporate voicemail extension appears.

Change the Voicemail Notification setting

The voicemail notification feature allows you to obtain SMS notification on your iPhone when new voicemail arrives in your corporate voicemail inbox. If you have multiple mobile devices, the SMS is sent to the mobile device that is defined as your mobile device in your Avaya one-X Mobile Web account. You can change the voicemail notification preference to On, Urgent Only or Off. Voicemail will appear in your Voicemail inbox and Call Log inbox no matter which voicemail notification preference you choose for your mobile device.

To change your voicemail notification setting:

1. On the Avaya one-X Mobile Home screen, tap  .
The current VM Notification setting is displayed on the Setup screen.
2. Tap **VM Notification**.
3. Tap one of the following:
 - **On**—you receive notification of all voicemail.
 - **Urgent Only**—you receive notification only of voicemail marked urgent.
 - **Off**—you do not receive voicemail notification.A tick indicates your selection.
4. Tap **Setup** to return to the Setup screen.
The new Voicemail Notification setting appears.

Change the Call Back setting

Avaya one-X Mobile provides Call Back functionality that allows you to place calls through your office phone system. However, under some circumstances such as lack of a stable data connection with your phone carrier, it may be more effective to make a call directly using your mobile carrier. The **Call Back** setting allows you to switch the default Call Back behaviour between **Call Back via PBX** and **Call Back via Mobile**, as required.

To change the Call Back setting:

1. On the Avaya one-X Mobile Home screen, tap  .
The current Call Back setting is displayed on the Setup screen.
2. Tap **Call Back**.

3. Tap one of the following:
 - **Call Back via PBX** — your office telephone system will initiate a conference call between a Send Calls destination and the number you are calling. This is the most economical way to make a call.
 - **Call Back via Mobile** — calls are placed through your mobile carrier.A tick indicates your selection.
4. Tap **Setup** to return to the Setup screen.

The new Call Back setting appears.

Change the Sort Order setting

You can base the results of any Avaya one-X Mobile search activity on either the first name or last name of the person you are searching for.

To change the Sort Order of the search activity results:

1. On the Avaya one-X Mobile Home screen, tap .

The current Sort Order setting is displayed on the Setup screen.
2. Tap **Sort Order**.
3. Tap one of the following:
 - **First Name** — search results will be sorted alphabetically by first name.
 - **Last Name** — search results will be sorted alphabetically by last name.
4. Tap **Setup** to return to the Setup screen.

The new Sort Order setting appears.

Change the Call Back Delay setting

You may need to increase the Call Back Delay if your iPhone does not ring during a Call Back.

To change the Call Back Delay:

1. On the Avaya one-X Mobile Home screen, tap .

The current Call Back Delay setting is displayed on the Setup screen.
2. Tap **Call Back Delay**.
3. Tap the text field to bring up the keyboard.

Changing the Avaya one-X Mobile Settings

4. Change the current setting as appropriate.
5. Tap **Setup** to return to the Setup screen.
The new Call Back Delay setting appears.
